

Technical & Soft Skills

Agile/Scrum methodologies, adaptive learner.

HTML, CSS, JavaScript, iOS, Kotlin, React, Cypress, Jest, Maestro

Education

- **Bachelor of Applied Science – Mobile Application Development** **Graduated 06/2024**
Cascadia College | Bothell, WA
- **AAS–T Web Application Programming Technology** **Graduated 09/2022**
Cascadia College | Bothell, WA
- ❖ **Awards: Washington State Opportunity Scholarship, Cascadia College Foundation Scholarship.**

Projects

Visual Intellectual Property Search ([VIPS](#))

- Developed and maintained end-to-end automated tests using Cypress to enhance system reliability.
- Identified and reported software bugs, improving application stability and search accuracy.
- Assisted in refining UI/UX testing strategies to ensure seamless user experience.

Suite Of Comprehensive Rapid Analysis Tools for Environmental Sites ([SOCRATES](#))

- Contributed to frontend development using React and TypeScript to build interactive data visualization tools.
- Developed Cypress-based automated test scripts to ensure data integrity and application performance.
- Worked closely with environmental scientists to translate research requirements into functional UI components.

Nuclear Smuggling Detection and Deterrence (NSDD)

- Implemented Jest Unit and Snapshot tests to validate application functionality and prevent regressions.
- Utilized Maestro to automate mobile UI testing, ensuring consistent behavior across devices.
- Provided QA support by identifying and troubleshooting defects in both web and mobile applications.

Mobile Developer – [Pollinator Pathway](#)

- Participate in a team project to develop an Android and iOS application for new and existing pathway members.
- Design and develop features of the application based on the users' empathy.
- Collaborate as a team to build the App from scratch to an MVP using GitHub and the JIRA agile process.

Full Stack - The Stream App

- Built a rich web application using HTML, CSS, PHP, and MySQL database where users can see current popular movies information and create their favorite list to view later.
- Used external API call from TMDB to get movie information such as Movie poster, overview, and rating.

Work Experience

Post Bachelor's Research Associate - App & Systems Testing

Department of Energy, Pacific Northwest National Laboratory | Richland, WA **09/2022 - 03/2024**

- Ensuring automation in quality and performance of software applications using Cypress.
- Provided software engineering and web-based application support for research at the EMSL user Facility using TypeScript and PostgreSQL.
- Learn to communicate in a team and under supervision to agree on the backend development process.
- Collaborate with senior developers to ensure the quality of software products by following industry best practices and standards.

Front End Engineer Intern

08/2019 – 03/2020

Precor | Woodinville, WA

- Developed user interface applications for Precor's web products, enhancing user experience for health and fitness goals.
- Implemented responsive UI components using CSS, HTML, JavaScript, and React.js while optimizing platform code reuse.
- Collaborated with software engineers to develop, test, and review code for improved functionality and performance.
